RE: PE Samples - Warzyn Engineering Inc.

Dear Ms. Chulick:

Per our discussion of Thursday, April 5, 1990, Warzyn Engineering Inc. (Warzyn) will be proposing the potential use of three analytical laboratories in support of the Saegertown RI/FS. Warzyn will provide inorganic analysis. Lord Corporation will provide organic analysis. CompuChem will provide low-level detection analysis for both organics and inorganics, and will serve as backup to both Warzyn and Lord.

Warzyn is in the process of analyzing PE samples for EPA Region V, with a scheduled completion date of mid to late April, 1990. Please contact Mr. John Morris of the EPA Central Regional Laboratory should you have any questions or feel that you may be able to use the results of such analysis. Warzyn is also currently being audited by EPA Region V for conventional wet chemistry analysis.

Should you wish to proceed with PE samples for Warzyn, please send the samples to:

Ms. Kim Finner
Warzyn Engineering Inc.
Laboratory Manager
One Science Court
